The follow up to our Cuts of Culture compilation will finally see the light of day this summer, as a series of exclusive multi-content podcasts.

Originally planned for a 2006 release, as a CD/DVD package, we feel times are changing and that exposure, not profit, is the key issue here. Hence we intend to make this release available FREE via a dedicated series of podcasts - the first time anyone has used podcast technology to make available a complete package that would normally be on CD and DVD. These podcasts will be broadcast via the Turntable Radio feed.

This includes 6 exclusive videos, bonus tracks, scratch beats, full artwork and liner notes as well as the compilation mix from 2tall. Artists featured on the compilation, tracks and videos include D-Styles, 2tall, Excess, Netik, ieMERGE, Tayone, Phonomorphia, Exile (from Emanon), Dq, DJ Baku and many more.

As was the original intent, this second volume aims to showcase even more of the established and upcoming worldwide talent including collaborations with established producers from the worlds of hip hop and electronic music. Once more this is about showcasing the music that is being worldwide, and too often ignored or unheard of by fans and the wider public and media in general.

The podcasts will start on the 3rd week of July, and will be available one a week for 8 weeks, culminating with the compilation mix from 2tall. If you're not already subscribed to the Turntable Radio podcasts you can do so in many ways: load up iTunes, go to podcast directory and search for Turntable Radio, then click subscribe. Or subscribe directly using most of the available podcatchers by using our Feedburner link - feeds.feedburner.com/turntableradio.

Below is a full tracklist of the podcasts contents and you can check our trailer on youtube (above). Also look out for regular Turntable Radio podcasts and a special one off to be aired during the summer as well.
